Mach7 Technologies' Physician & Patient Portal Consolidates Patient Care Records Across the Enterprise and Simplifies Image Sharing and Communication

Mach7's Physician & Patient Portal facilitates intelligent image management between enterprises, exchanges, providers and patients

Burlington, VT – July 29, 2014 – Mach7 Technologies, an award-winning provider of medical image management solutions, announced today the release of an enhanced version of its Physician & Patient Portal, version 11.5.

Mach7's Physician & Patient Portal enables direct communication and collaboration between physicians and patients. Patients gain access to a comprehensive view of their care history, including all imaging files. Mach7 seamlessly consolidates complete patient care records and intelligently delivers access to records where and when needed to save time, reduce costs and improve care delivery and patient satisfaction.

Mach7's Physician & Patient Portal version 11.5 features include:

- **Web-based, Zero-footprint** – Enable access to patient data through any web browser without downloading tools or data to the viewing device
- **Universal File Access** – Give patients and physicians consistent access to DICOM and non-DICOM files across workstations, personal computers and mobile device platforms
- **Intuitive User Interface** – Provide patients and physicians with a feature-rich, yet simple interface. The user interface virtually eliminates the complexities of user adoption, while providing the tools required for effective patient care and communication
- **Sharing and Communication Tools** – Allow patients to share procedure information with family, friends and physicians using secure email and protected portal access. Physicians can share and communicate between connected patients, physicians and third parties
- **Simplified Integration** – Enable clinical image viewing on EHR, HIS, and other healthcare systems through dynamic URLs
- **Secure Access** – Securely view procedure information backed by the latest encrypted web protocols and role-based directory authentication services

About Mach7 Technologies

Mach7 Technologies, headquartered in Burlington, VT, is a global provider of enterprise imaging solutions that allow healthcare organizations to easily identify, connect, and share diagnostic image and patient care intelligence anywhere at any time. Mach7's innovative communication and workflow technology delivers complete image management including rapid record identification, integration, synchronization and routing, advanced clinical viewing, and vendor neutral archiving across the enterprise.
