London Imaging Signs with Mach7 Technologies for Enterprise Image Management

Burlington, VT and London, UK – June 23, 2015 – London Imaging Centre, a leading independent diagnostics provider in the UK, partners with [Mach7 Technologies]®to streamline image management and workflow, and enhance their superior patient care through implementation of Mach7 Enterprise Imaging Platform.

A leading independent diagnostics provider located in the heart of London's Harley Street district, London Imaging is at the forefront of diagnostics in the UK, providing a diverse range of imaging services that are rapid, convenient and affordable. The comprehensive range of services for NHS and private patients include: MRI, ultrasound, X-ray, DEXA, and one-stop specialist clinics such as Backin2Hours.co.uk.

"Mach7 offered us a comprehensive solution that allows us to enhance patient care by enabling our specialized workflows for increased diagnostic intelligence. Knowing that our business needs will change, we like the fact that with Mach7, we will have the ability to easily monitor, track and adjust our workflow rules with a few simple mouse clicks" commented Mr. Les Clark, Director of London Imaging. "The strength of the platform coupled with the collaborative approach of the Mach7 team was a winning combination. The team took the time to really understand our workflow needs and they have the expertise to implement a solution that meets our unique requirements."

London Imaging joins leading healthcare systems selecting Mach7 including: Broward Health, Penn Medicine, Kennedy Health, and Radiology and Imaging Specialists in the U.S. along with HCA International in the UK.

[Mach7 Enterprise Imaging Platform] provides London Imaging with the following:

- **Cloud-enabled archiving** – The Vendor Neutral Archive efficiently consolidates and optimizes image storage and patient data - locally, remotely or leveraging cloud-based storage.
- **Flexible communication for image sharing** – The Communication Workflow Engine offers advanced capabilities to monitor and self-manage communication rules to address their unique requirements with a point and click interface.
- **Choice of image viewers** – Mach7's plug-and-play framework allows for integration with best of breed diagnostic viewers as well as Mach7's Universal and Zero Footprint Clinical Viewer for delivery of patient data where and when it can be most effective for patient care.
