

Mach7 Technologies Showcases Interoperability, Collaboration and Their Ascent to the Cloud at RSNA16

Mach7 previews the next release of their award-winning Enterprise Imaging Platform in Chicago, empowering healthcare organizations to “Be the Change” for patient care

Burlington, VT – November 17, 2016 – Mach7 Technologies (ASX:M7T), a global market leader in medical image management solutions, will present Mach7 Enterprise Imaging Platform 11.7.2 at the 102nd RSNA Annual Meeting in Chicago. With general release expected next month, 11.7.2 extends Mach7’s hallmark communication workflow technology, further enables interoperability across and beyond the healthcare ecosystem with RSNA validated Mach7 Image Sharing, and provides flexible options for cloud-based deployments.

Collaboration with RSNA for Increased Interoperability

Following a rigorous testing schedule, Mach7 has successfully completed and passed the RSNA’s pilot program Image Share Validation. The pilot program tests the compliance of image sharing solutions using standards for efficient exchange of medical images developed by Integrating the Healthcare Enterprise (IHE) and used in the RSNA Image Share Network. The program enhances patient care collaboration by expanding access to medical images and reports through standards-based interoperability.

Eric Rice, CTO of Mach7 Technologies commented “We are very pleased to receive Image Share Validation by the RSNA. This validation is a natural step in our effort to promote standards based interoperability and collaboration for optimal patient care.”

Mach7 Enterprise Imaging Now in the Cloud

Further supporting their mission of optimal patient care delivery, Mach7 recently announced their partnership with Microsoft Azure to bring its full suite of award-winning enterprise medical imaging solutions to the cloud. The new managed service offering provides hospitals and healthcare systems the flexibility to deploy a tailored solution that meet their diverse clinical, business, technical, and patient care needs with the security to safeguard hospital and patient data. The entire suite of Mach7 enterprise imaging solutions may now be deployed on premise, in the cloud, or via a hybrid model.

Rice noted “Mach7 is well known for flexible deployments that address our customer’s changing needs. This partnership offers even greater flexibility by enabling organizations to choose the model best suited to their enterprise imaging strategy whether it be in the cloud, onsite or a hybrid model. We are pleased to welcome Goshen Health as our first customer deploying Mach7 Enterprise Imaging Platform using the Microsoft Azure cloud infrastructure.”

Mach7 Welcomes Goshen Health as their Newest Customer Partner

Goshen Health, Indiana’s most comprehensive healthcare system, selected Mach7 based on the overall strength of its comprehensive solution and proven ability to achieve the specific workflow requirements that their legacy PACS could not fulfil. Mach7 will provide cloud-based vendor neutral image storage and archiving, EMR image-enablement with [Mach7 Clinical Viewer](#), and the ability for authorized clinicians to search, access, view and share medical imaging procedures with [Mach7 Image Sharing](#).

Mach7's Popular Ask-The-Experts Returns to RSNA

Again this year at RSNA, Mach7 offers the opportunity to speak one-on-one with industry professionals and customers about their experience with the Mach7 Effect – the positive and far-reaching impact that originates with the implementation of [Mach7 Enterprise Imaging Solutions](#) and extends to benefit IT, clinicians and patients. The power of Mach7 Enterprise Imaging Solutions is making waves and sending ripples throughout hospitals and healthcare systems, solving real-world workflow issues, simplifying scalability, improving clinical productivity, increasing IT cost savings and most importantly, improving the lives of patients.

[Be the change](#) that healthcare is waiting for. Be the change for patient care. Ask Mach7 how at RSNA in the North Hall, Booth #7723. Stop by and register to win an Amazon Echo or Dot – follow us on Twitter for more details.

About Mach7 Technologies

Mach7 Technologies (ASX:M7T) develops innovative enterprise imaging IT solutions that create a clear and complete view of the patient to inform diagnosis, reduce care delivery delays and costs, and improve patient outcomes. Mach7's award-winning enterprise imaging platform provides a vendor neutral foundation for unstructured data consolidation and communication to power interoperability and enables healthcare enterprises to build their best-of-breed clinical ecosystems. Mach7's sophisticated workflow tools, advanced [clinical viewing](#) and optimized [vendor neutral archiving](#) solutions unlock silos of legacy systems empowering healthcare providers to own, access and share patient data without boundaries.
