

“Mach7 Technologies’ commitment to a customer-driven approach, consistent R&D focus, and state-of-the-art products evolved the company into a global leader. The company’s forte in technology and collaborative business partnerships enhance their unique value proposition of highly intuitive, scalable, and sophisticated enterprise imaging solutions. With next-generation PACS, a vendor-neutral archive, and cross-specialty imaging and integration platforms, Mach7’s strategic commitment focuses on solving problems and improving the scalability of legacy PACS. Mach7’s imaging intelligence makes it a technology pioneer in the enterprise imaging business. Its leadership strategy, along with B2B strategic partnerships, has successfully broadened the company’s footprint in North America, Europe, and Asia-Pacific regions.”

## ENTERPRISE IMAGING SOLUTIONS GLOBAL PRODUCT LEADERSHIP AWARD

Frost & Sullivan recognizes Mach7 Technologies for its superior customer-driven approach, technological and clinical solutions for enterprise image management, and vendor-neutral archiving (VNA) aspects in aligning the care pathway of various clinical, IT, and enterprise-wide medical imaging stakeholders. Amid stiff market competition in regions such as North America, Asia-Pacific, and Europe, Mach7 capitalizes on its products to match the needs of new and existing business opportunities. It has successfully established its presence and branding in the enterprise imaging and healthcare informatics segment with a focus on PACS, data management (VNA), universal diagnostic viewing, clinical workflow management/communication and interoperability. Known for its impeccable standard of service across sectors and competitive pricing, Mach7 fulfills customer expectations in new installation support, intuitive user-friendly interfaces, and legacy PACS replacement with next-generation PACS and cross-specialty imaging and integration platforms. Frost & Sullivan acknowledges Mach7’s best product and service offerings and celebrates its success in the global arena.
